

It has been brought to my attention that our local Hampton Roads K-Love station could be taken off the air. This radio station is an important part of this community. If it were not for that station being on the air I would not be here. It was when I was depressed that I heard the station and it was through them that I did not take my own life. There are more than enough regular radio stations in this area. Being a high military transit area it is beneneficial for people to have the option of listening to something that can change their life. I am now in college and completing my Bachelor Degree because I have K-Love here to support me. Now I can go back out and give to the community. If it wasn't for K-Love the only thing I would have given the community was another tombstone in a graveyard.
